

(A) Belief Versioning: Learning Preserved

(B) Predictive Control: Learning Destroyed

(C) Spiral Rates (Lower = Better?)

(D) Why This Matters

Learning Preservation Criterion (LPC)

BELIEF VERSIONING:
Spiral rate: 8.1%
Mean checkouts: 0.5
Beliefs move between interventions
LPC: PASS (genuine belief dynamics)

PREDICTIVE CONTROL:
Spiral rate: 0.0%
Mean belief: 0.48
Beliefs suppressed at uncertainty
LPC: FAIL (belief movement prevented)

TRADEOFF:
0% spiral rate achieved by suppressing
belief movement throughout interaction.
BV preserves belief dynamics.
